

Introduction to the Outcomes Monitoring Program (OMP) & California Outcomes Measurement System (CalOMS)

Department of Alcohol and Drug Programs (ADP)

What is the OMP?

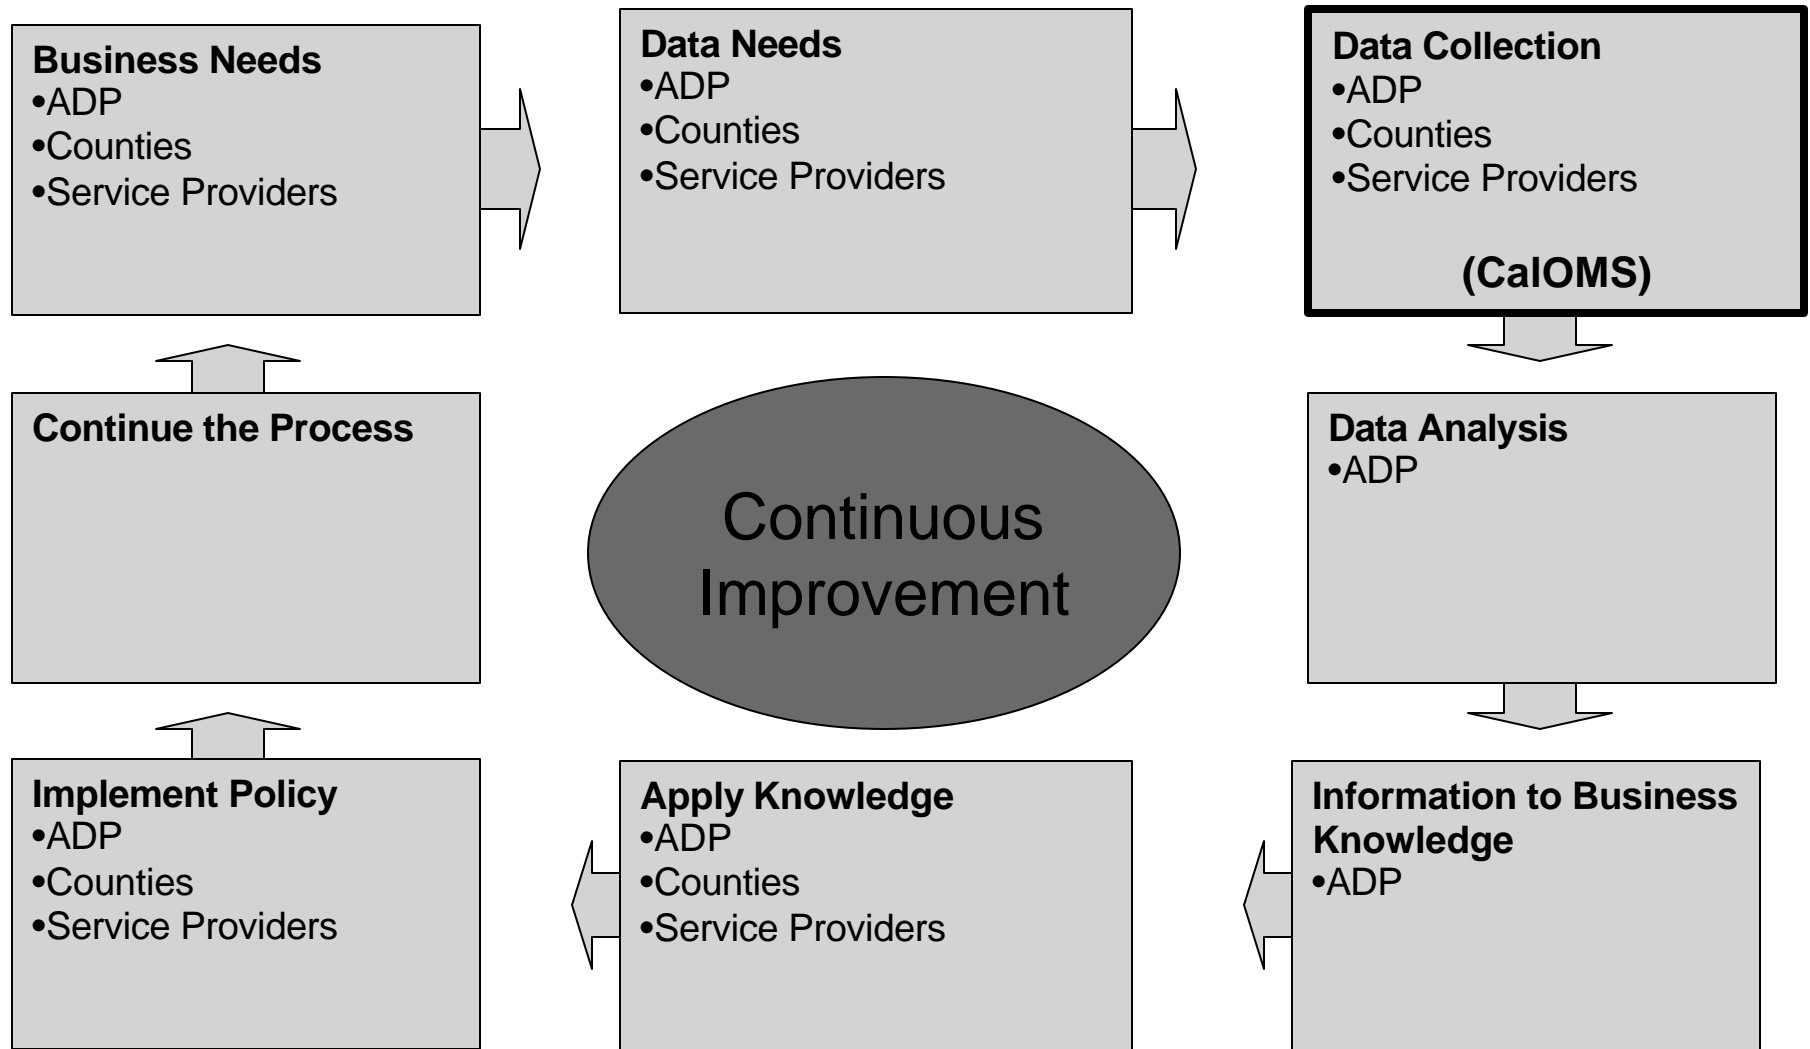

The Outcomes Monitoring Program (OMP) is the product of California's Strategic Initiative to continuously improve alcohol and other drug (AOD) prevention and treatment programs by:

- *Collecting and analyzing data;*
- *Identifying service and outcomes trends; and*
- *Using this business information to implement strategic policy changes.*

What will the OMP do for us?

- **Improve delivery of services**
- **Document measurable improvement in lives and communities**
- **Enhance the potential for new funding initiatives and provides data for assuring continued funding**
- **Increase Provider, County and State collaboration**
- **Identify effective practices**
- **Demonstrate services are cost effective**
- **Increase capacity and capability of AOD prevention and treatment programs**
- **Increase AOD counselor capabilities and skills**
- **Increase ability of prevention services providers and staff to meet specified core competency requirements**
- **Meet Federal reporting requirements**

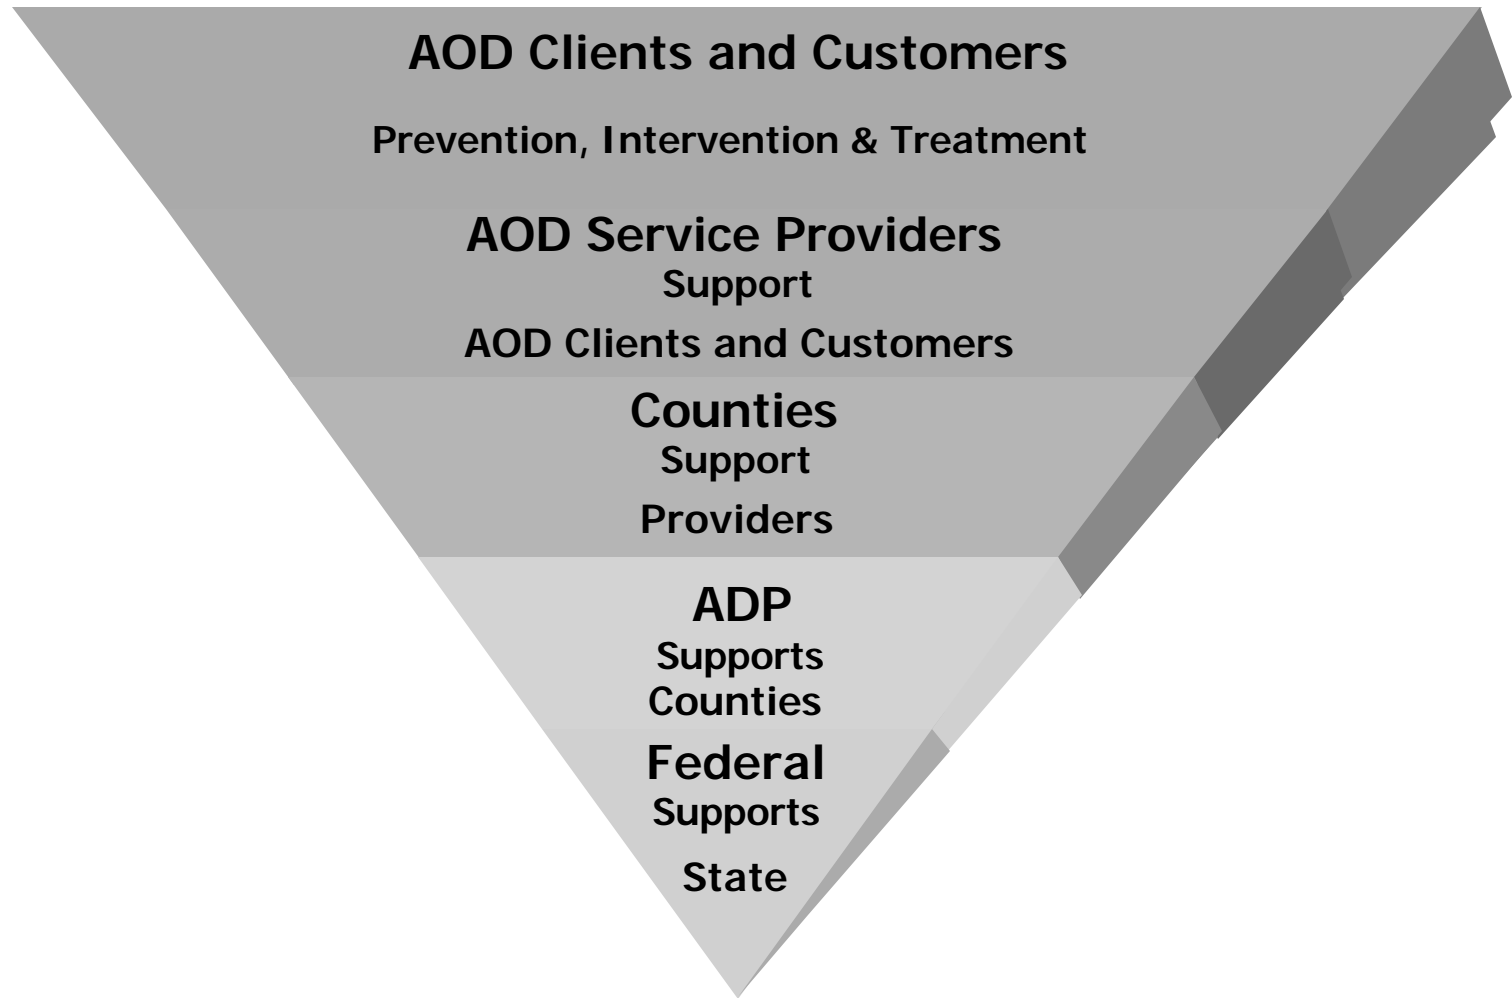

California Outcome Monitoring Program

Why is Outcomes Measurement Important?

Our Goals for Outcomes Measurement

What is the CalOMS?

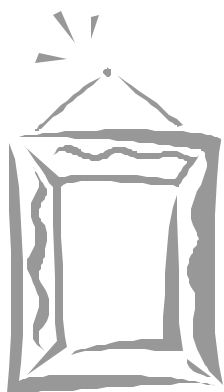

- The California **Outcomes Measurement System (CalOMS)** is the data collection and reporting tool for the OMP.
- CalOMS will support client/participant services giving Counties and Providers:
 - ❖ The ability to analyze their business and improve services for AOD clients/participants;
 - ❖ A sense of control through the addition of structure;
 - ❖ A focus on aspects of their programs that they may not normally consider; and
 - ❖ An internal report card.

How does prevention fit in?

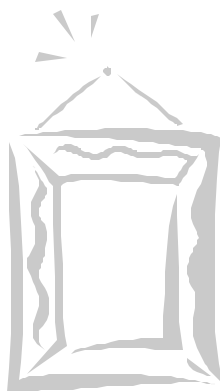

- ❖ Defining vision, goals, data, and system needs for outcomes
- ❖ Prevention Strategic Design - Subproject under the OMP
- ❖ Provides a plan to enable increased accountability for measuring and reporting prevention outcomes
- ❖ Targeting October, 2006 to meet Federal PPG Prevention requirements

How will CalOMS work for treatment?

Take a point in time Picture of a Client by Gathering Data on that Client at Admission

- Gather the Same Data on the Same Client after a Specified Period of Time

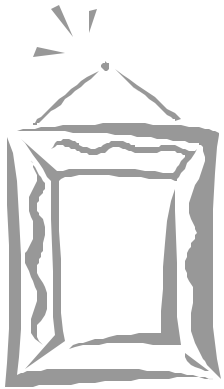

- Evaluate the Differences to Determine the Outcome

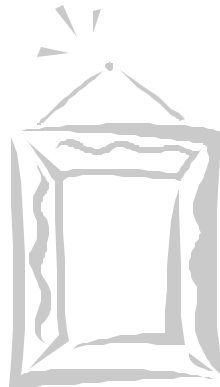

How will CalOMS work for prevention?

Gather pre/post
service
information on
program
participants/
communities

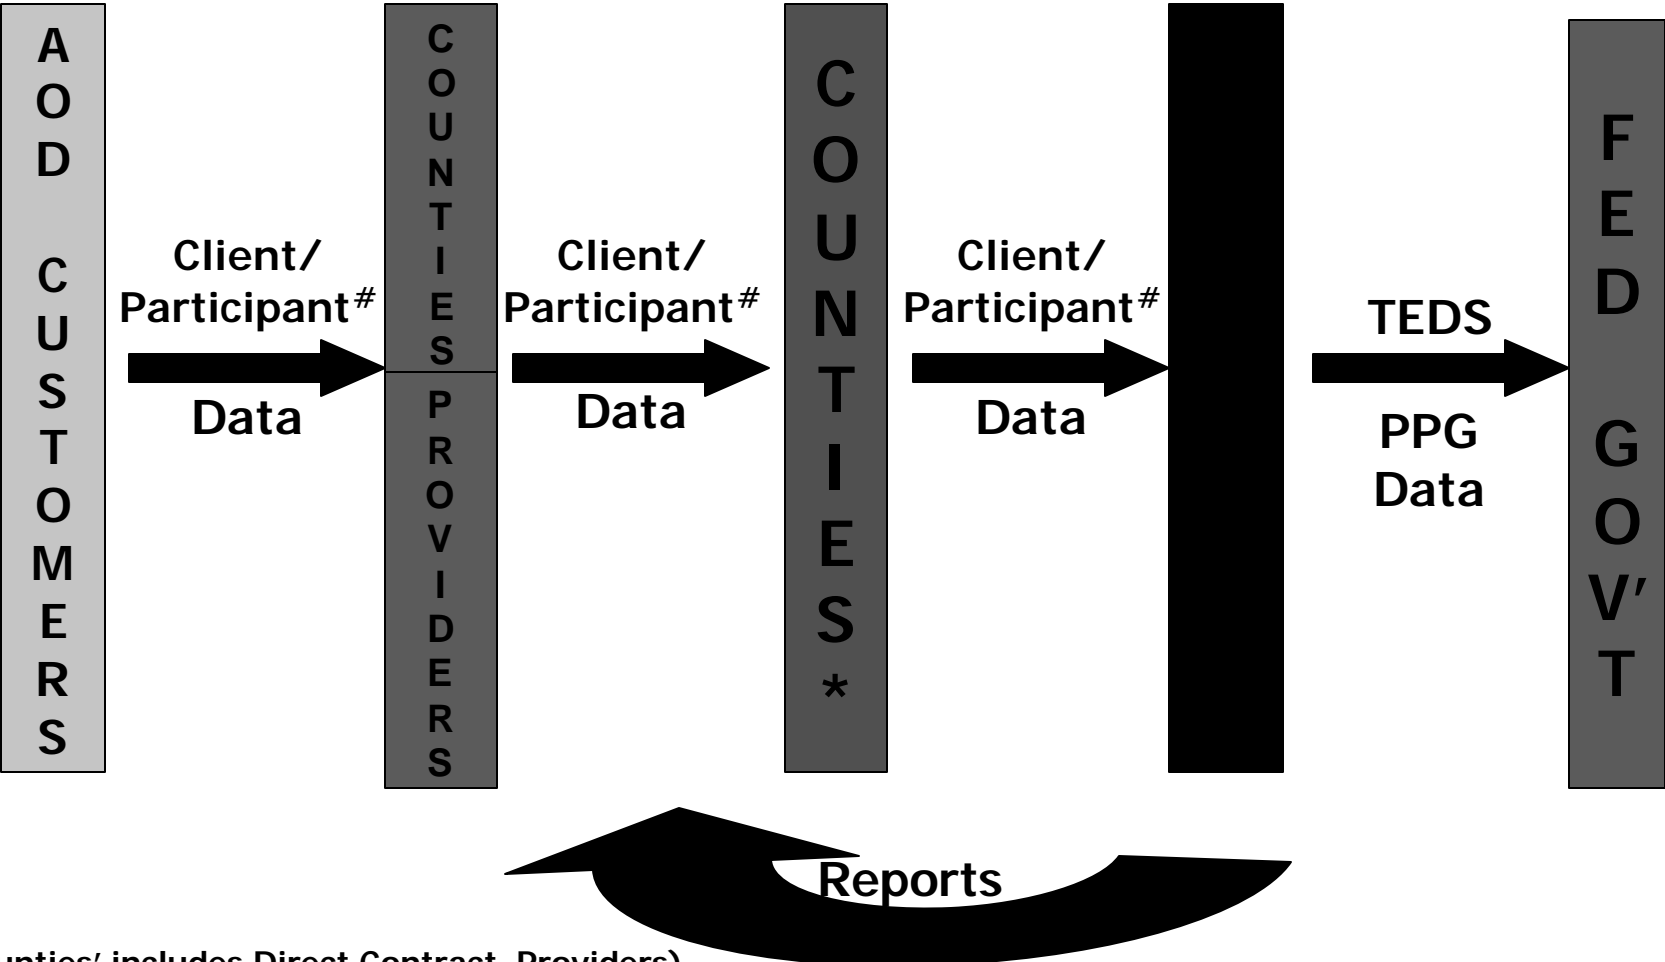

- Document
services
provided

- Measure
achievement
of outcomes

Where do you fit in?

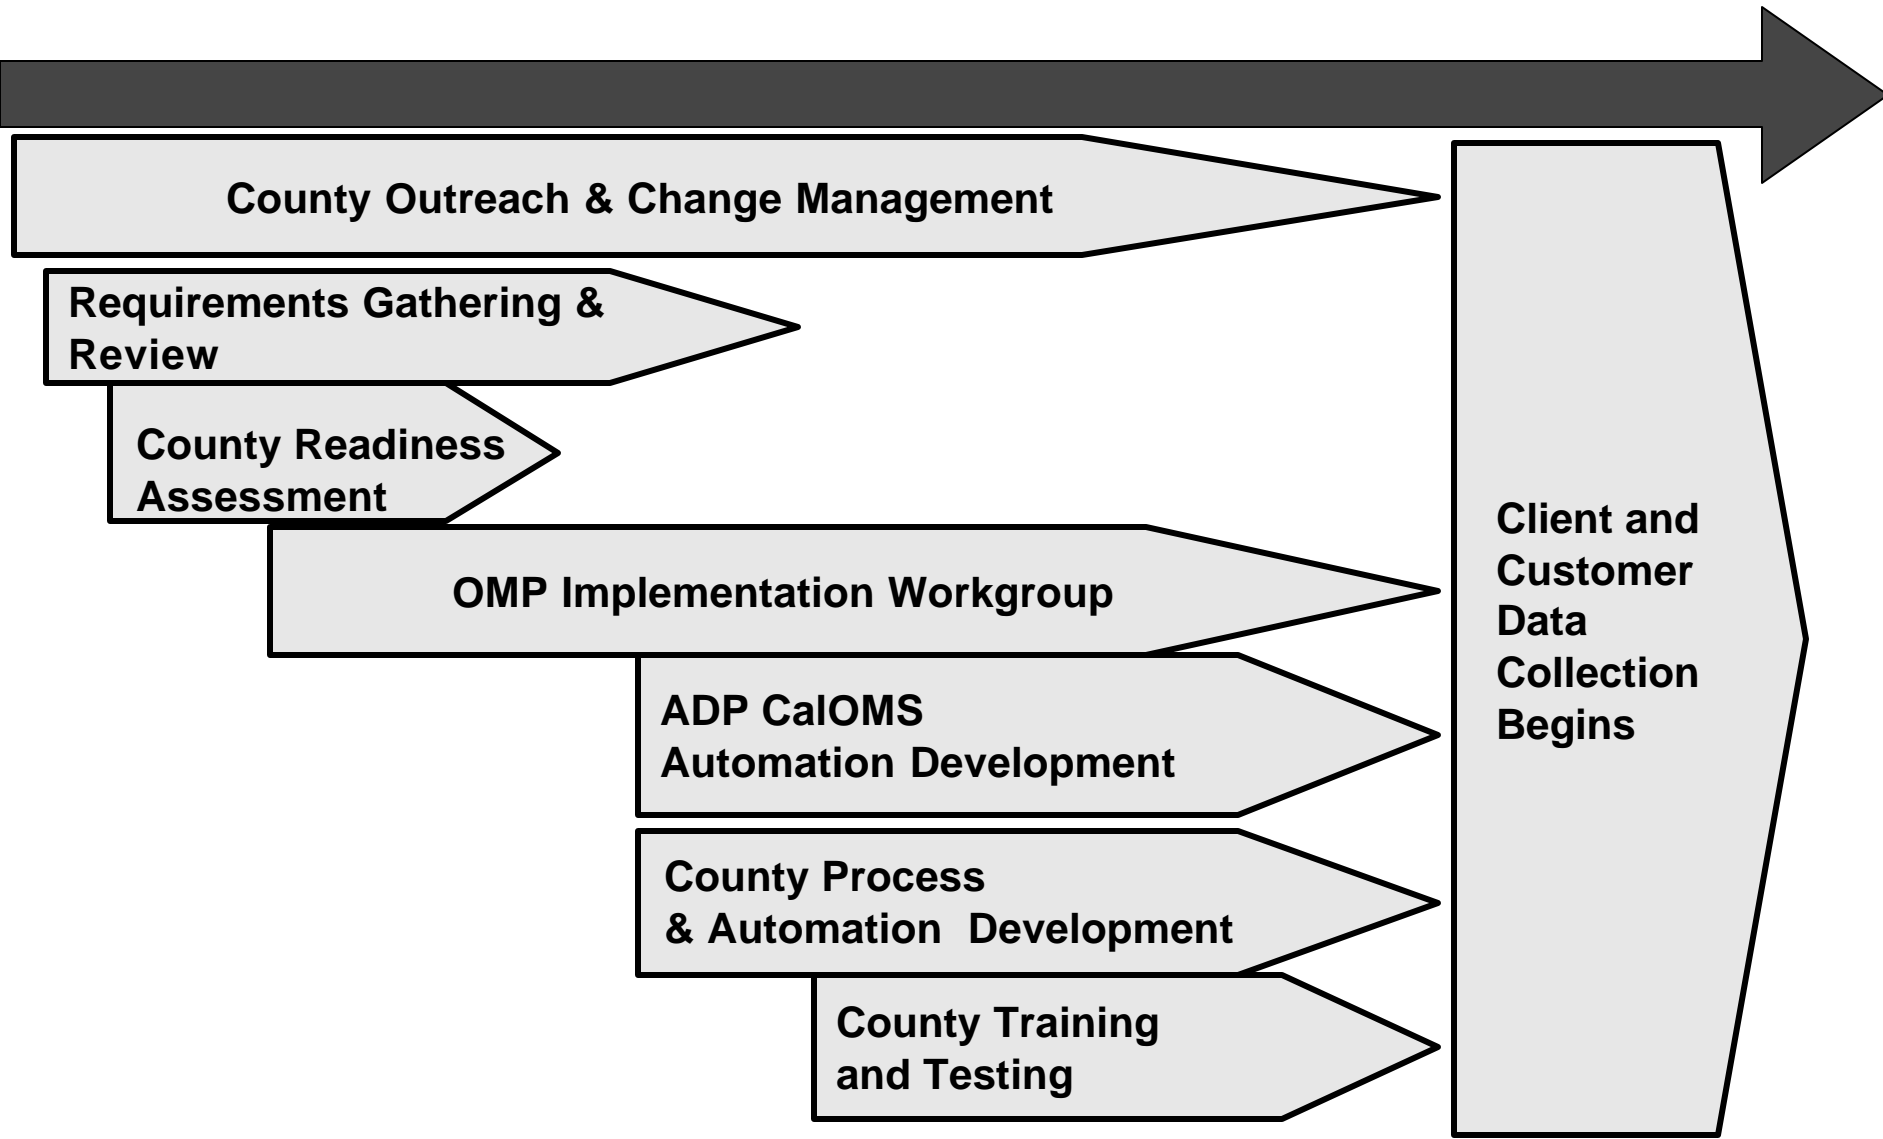

(* 'Counties' includes Direct Contract Providers)
(# Participant includes Individuals, Communities, and Large Environments)

Downloads

What is the OMP Implementation Workgroup?

- ADP formed the OMP Implementation Workgroup to refine the requirements and timeline for the implementation of CalOMS.
- - ❖ Includes subgroups for topics such as treatment issues, prevention issues, automation issues, communication issues.
 - ❖ Completes the first phase of its work on CalOMS by June 30, 2004.

Treatment & Prevention Implementation Steps

Ultimate California OMP & CalOMS Result

Working together we can achieve our shared vision of healthy individuals & communities free of alcohol and other drug problems
